

## 2021 Daily Sketches Project

For this project, I drew an everyday object on a postcard every day from February to June 2021 using a felt-tip pen. The drawings were stamped, photographed, tagged and published on Instagram.

This resulted in around 140 small drawings and an Instagram project that is still surprisingly popular today. I also learnt about the huge drawing community on Instagram - my first (and so far only) experience with this medium.
