2020 Something Deep Inside

These five panels have been shown at my Freiburg exhibition in 2020. They are inspired by color theory, and each panel uses a different technique. The connecting element underneath is this prairie grass in blue, which runs like a little blue thread through these panels.

2020 Acrylic on Canvas (Something Deep Inside), Five Panels, 95 x 95 cm each

The panels can be hung individually, depending on the conditions in the room. I will be happy to advise you!
